

Information

The SafeGauge Inspection Camera gives technicians a second set of eyes to safely inspect components in danger zones, including crush points and confined spaces.

With real-time, 360°, 4K vision that rivals human eyesight, it enables accurate visual inspections from a safe distance of up to 50 m (164 ft).

By removing personnel from danger zones, the Inspection Camera greatly improves safety outcomes and often reduces the need for multiple spotters, allowing tasks that traditionally require two to three people to be completed by a single technician. It also improves maintenance documentation with the ability to capture photos and videos that can be saved and shared.

Features

1. Stream high-res imagery from up to 50m away
2. Take, save and share videos and photos
3. Pan, tilt and zoom capability
4. 360°, 4K video resolution
5. Rugged design for tough mining conditions
6. Fast set up in less than 10 seconds
7. Strong magnetic mount with lockable swivel head

Inspection Camera

Quick Setup

1. Press the power button to power on. Use the serial number (found on bottom of camera) to connect to the MultiTool Pro.
2. Mount the camera to a vehicle component.
 - Ensure mounting position is clear of moving components.
 - Use a mag base fall restraint if heavy vibration is expected.
 - Use the swivel base to orient the camera vertically so that the pan feature is more intuitive.
3. Press **Start Test** to view the live feed.
4. When viewing the live feed, **pinch to zoom** and **swipe to pan**. Exposure can be adjusted in the live feed for low light conditions.
5. Record video and take photos in the MultiTool Pro. Media will be downloaded to the MultiTool Pro, where it can be shared via email or USB.
